

Good Vibrations

K3 Vibratory Feeder

KEY BENEFITS

On avg. 35% more accurate than traditional vibratory technologies

Quick change design & practically maintenance free

Minimal heat dissipation & less energy consumption

Gentle handling of fragile material

APPLICATIONS

FOOD

- Especially suitable for fragile food ingredients
- **For example:** high accuracy feeding of finished food products to packaging lines

- Accurate feeding for the optimal dosage of pharmaceutical ingredients

- **For example:** feeding of uncoated tablets to coating lines

PHARMA

RECYCLING

- Reliable feeding of hard-to-handle materials such as recycled pellets
- **For example:** feeding of regrind to plastic extrusion lines
