

# Go Gently with the Flow

ZV Series Rotary Valves for Pellet & Granular Products

## TOP 5 BENEFITS OF NEW ZV ROTARY VALVES

1. Reduces chopping/damage to pellets due to special inlet geometry
2. High throughput design by larger inlet cross section
3. Safe to start under head of material (full product column)
4. DIN or ANSI flange instead of proprietary pattern
5. Lower stack-up height and reduced noise level with integrated vent instead of using added shear protector device or leakage venting device

## CONFIGURATIONS

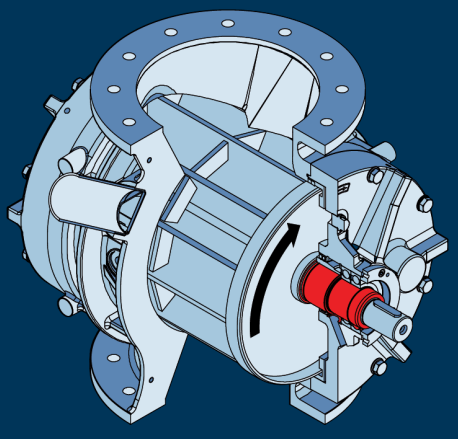

**ZVD**

PURGED OPEN-ENDED ROTOR

**ZVB**

CLOSED-END ROTOR

**ZVH**

CLOSED-END ROTOR & HIGH-PRESSURE DIFFERENTIAL

Dusty/Fines PC, PVC, PVC Re grind, Re grind with Fines

Clean Pellets PE, PP, PA, PS, Coffee

High-Pressure Conveying of Pellet and Granular Prill, Wheat
