

Want to validate your Material Handling Process?

At Coperion's **Material Handling Test Center in Weingarten,** customers can validate bulk material behavior, conveying concepts and process parameters under realistic conditions - from laboratory analysis to industrial-scale trials.

Test before you invest. Validate before you scale.
Test your bulk material characteristics and its performance for a **special price** in order to validate your process optimization or plant scale-up.

Benefit from our exclusive material handling trial weeks, **starting in October 2026.**

Available trials for bulk materials (pellets, powders and flakes)

- ↗ Pneumatic Conveying
- ↗ Rotary Valve (Discharge and Dosing)
- ↗ Pellet Cleaning (Elutriation)
- ↗ Product Degassing & Deodorization
- ↗ Shear Tests for Bulk Materal Storage & Discharge
- ↗ Other Tests (Cooling & Heating / Blending, Mixing & Feeding)

Latest booking September 25, 2026

Contact us now → **cwgtestcenter@coperion.com**

Please note:
- → Feasibility and Modification of trials with your product will be confirmed based on your inquiry
- → Arrival of bulk material at least one week before anticipated trial week
- → Trials and pricing are currently based on special defined test set-ups
